QUANTUM RESOURCES LIMITED ANNOUNCES SIGNIFICANT GOLD INTERCEPTS AT ITS WHITEHEADS PROJECT ALONG STRIKE FROM CARRICK GOLD'S 2.8Moz LINDSAYS GOLD RESOURCE, WESTERN AUSTRALIA.

Melbourne, Australia – Thursday 14th February 2008 – Quantum Resources Limited (ASX: QUR) with projects in Western Australia and the Northern Territory announces significant gold results from its recent drilling program at the Whiteheads project located 65 kilometres north east of Kalgoorlie within the Eastern Goldfields Province in the Yilgarn Craton, Western Australia.

The drill program targeted gold mineralisation within NNW striking shear zones related to extensive shearing and quartz veining along lithological contacts and in fine grained clastic and pyroclastic rocks of the Gindalbie Formation. This same formation hosts Carrick Gold Limited's Lindsays gold resource of 28.9Mt @ 2.98g/t for 2.8Moz, which is located 3km along strike and to the north of Quantum Resources' current gold intercept listed below.

HOLE	EAST	NORTH	FROM	INTERCEPT
WTHB1408	374740	6640760	44 metres	8m@2.17g/t gold
WTHB1408	374740	6640760	60 metres	4m@3.61g/t gold

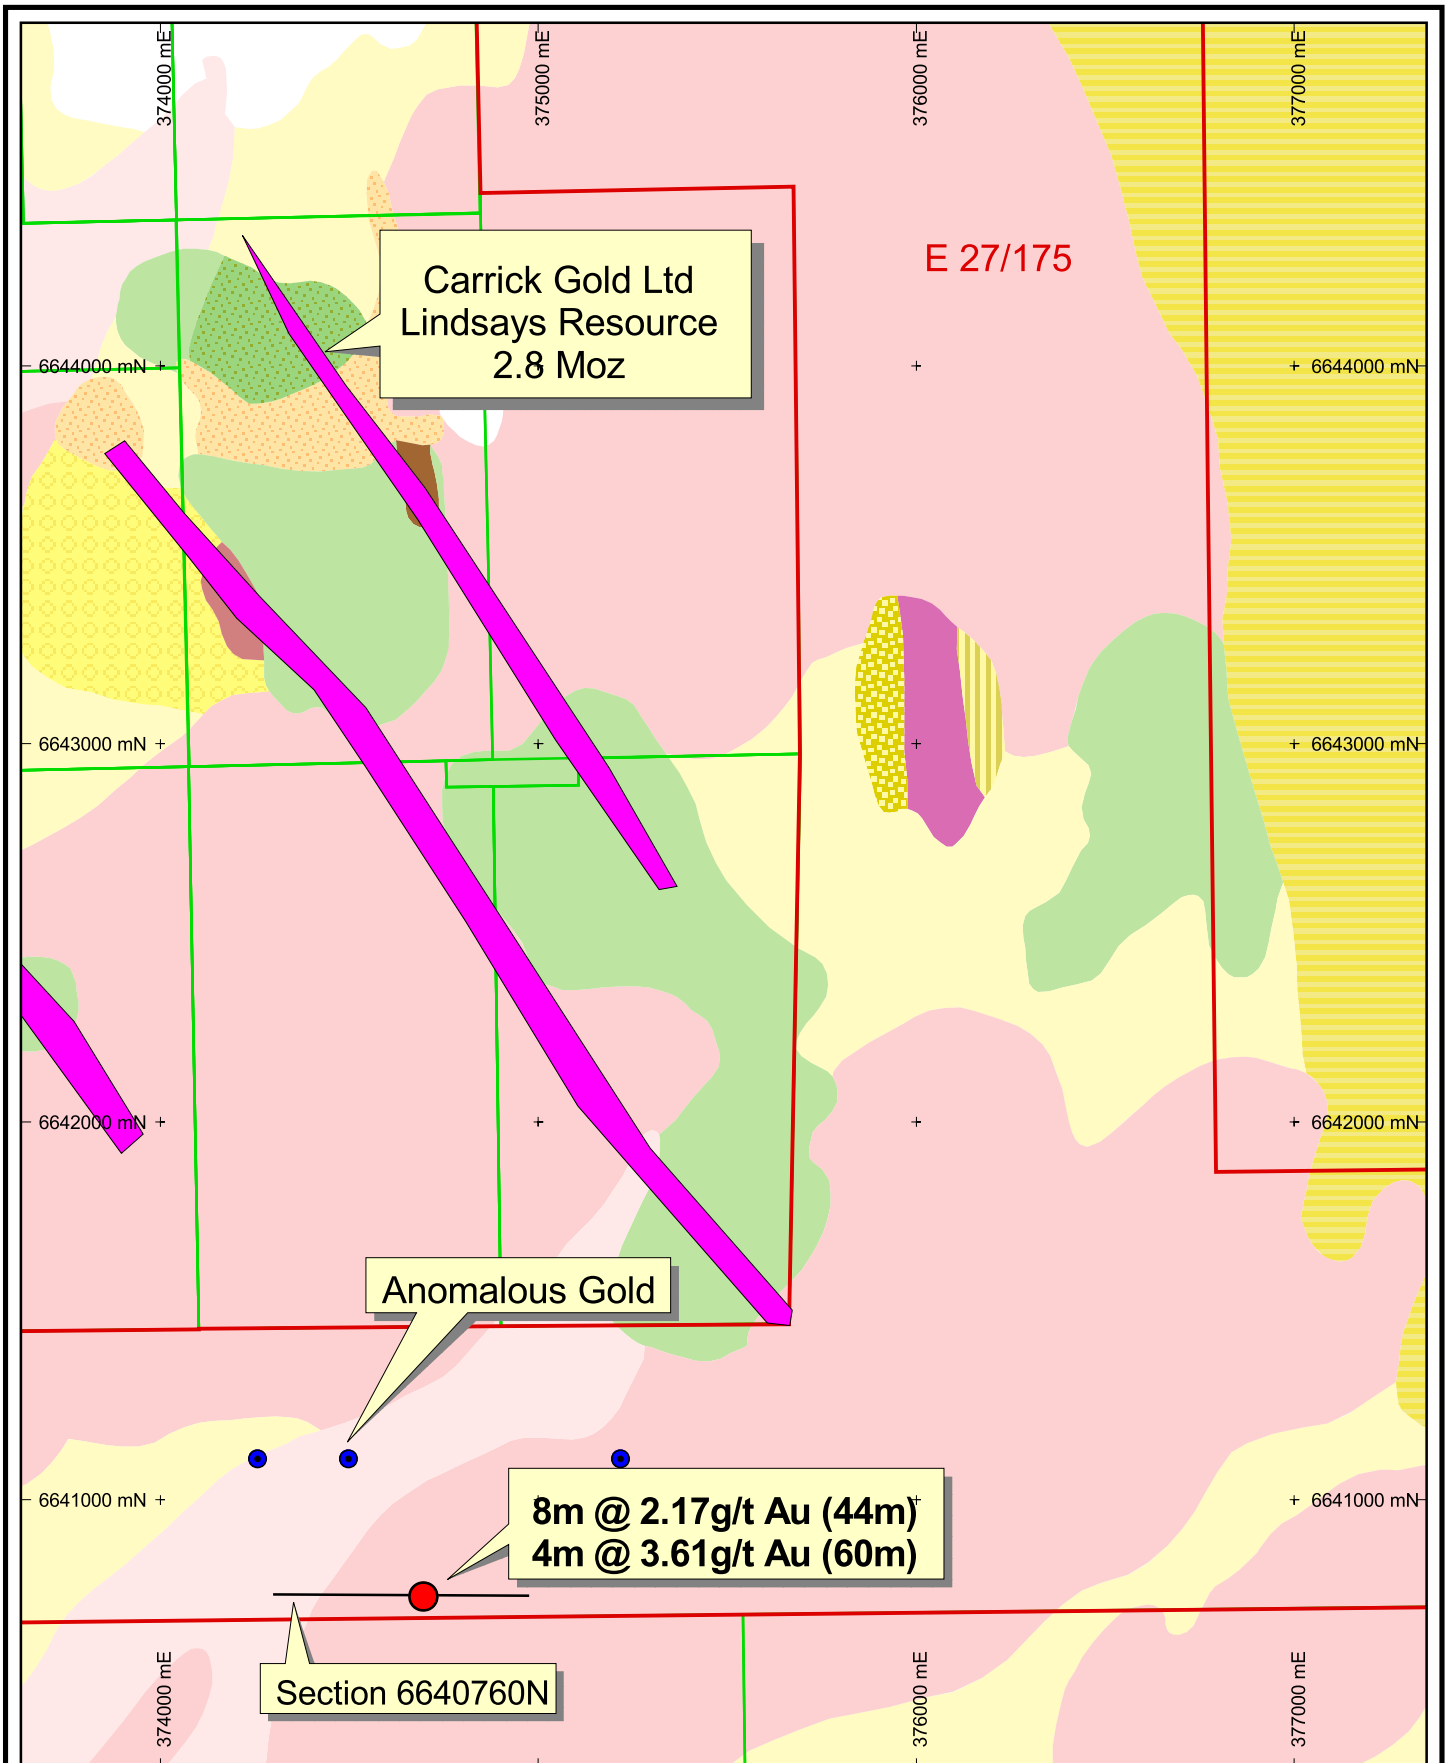

The next drill program will infill the 400m lines which have currently been drilled. The line immediately north of this intercept also contains anomalous gold values along strike of hole WTHB1408.

About Quantum Resources Limited

Quantum Resources Limited is an Australian base metal, uranium and gold explorer with a suite of projects whose tenements cover approximately 20,000 square kilometres in the Northern Territory and Western Australia.
