Sydney NSW 2000

Dear Sir

### **SUMMARY OF ANNOUNCEMENT**

Gardner Range and Ware Range Projects

### **DETAILS OF ANNOUNCEMENT**

The Company's Gardner Range uranium project in northern Western Australia consists of three tenements covering areas prospective for unconformity-related uranium mineralization. This includes the Mt Mansbridge prospect where significant uranium mineralization to 980ppm was identified by BHP Exploration in the 1980's.

The tenements will be granted next week followed by a detailed soil and rock chip survey with the intention of defining drill targets.

The Ware Range exploration license across the border in the Northern Territory has been granted, and a first pass reconnaissance has recently been completed. Laterite capping over the prospective unconformity will be used as a geochemical tool for target generation.

Yours faithfully

PETER LEE  
General Manager Corporate  
& Company Secretary
